

FOR SCIENTISTS, LEADERS, INNOVATORS, VISIONARIES & YOU.

Discover your potential and gain new skills to become a more effective, more admired and sought after scientific leader.

Supporting Scientific Leaders

EDC prioritizes science. Our belief is that scientists can excel in their work with the support of an effective management system. We have designed a flexible and easy-to-learn management system specifically for biomedical labs. Historically, a proficient lab manager was always deemed crucial, but at EDC, we have crafted a system that functions successfully without one.

Who Are We?

EDC has focused on identifying inefficiencies in life science research institutions for 20 years. They emphasize Operational, Personnel, Financial, and Research management. The team uses effective management practices to enhance productivity and create adaptable systems. Their strategy targets laboratory growth by addressing inefficiencies with actionable improvements, leading to ambitious laboratory development and expansion.

Our Services

Seminars & Workshops

Our training seminars and workshops support scientists at all career stages: Negotiations, recruitment, budget development, team culture development, project management, leadership, lab operations, team communications and more.

Group Training

We provide group sessions to build and motivate life science teams or to support postdoc and faculty career advancement through our Clear Path and Postdoc development programs.

1-on-1 Executive Development

Coaching and support for scientific faculty and life science leaders to achieve their goals and milestones efficiently and effectively. Our flagship one-on-one Clear Path Program can also be paired with operational support.

How the Clear Path Program Works

Establishing Your Team and Foundation with EDC

Done with you. Work with EDC.

Establish a **CLEAR PATH** for your scientific journey by understanding the upcoming actions, having confidence in your choices, and conserving time and energy for what truly matters to you and your scientific pursuits.

Use EDC's proven strategies, methodologies, and steps for **SUCCESS**.

Successful Strategies

EDC helps you find the right team and the best **CULTURAL FIT**.

Talent Selection

EDC team will get to work on your lab and execute **YOUR VISION**.

Training & Support

Team Success

Timeline:
3-6 months

Science Success!

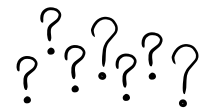

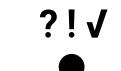

Do it yourself the Solo Scientist

You're unsure of the next steps, **FEELING LOST** on where to begin, or simply strapped for time. Where do you find the time to assemble your team, establish a lab, and write for grants?

Uncertain support & unknown variables can lead to **UNFORESEEN OUTCOMES**.

Guess Test Strategies

Without a proven track record or strategy, the risk is team **FAILURE**

Indecision & Overwhelm

Team Failure

Timeline:
12-18 months

Science Failure
